

Roots2Wings In Person Workshop

*in Collaboration with Special Education Technology Center (SETC)
and BSD Assistive Technology*

Bring It All Together. Dive In. Get Stuff Done.

Join us for a half-day, action-focused workshop designed to bring together everything we've covered in our last three months of online sessions—Person Centered Planning, Physical/Emotional Well Being & Mental Health and Social & Community Engagement.

Get Stuff Done

As the days get longer and summer begins to take shape, now is the time to explore programs, classes, and communities that support connection, growth, and belonging for teens, young adults, and beyond!

Come meet with representatives from different clubs, programs and camps across the Puget Sound.

Bring your questions, and to-dos. Many forms and applications can be started—or completed—during the workshop.

Immersive “Hands-On” Labs

Step into our Assistive Technology Immersive Lab designed to help neurodivergent individuals explore Assistive Technology Tools & Devices

This is a free event - all are welcome!
